PROFESSIONAL SUMMARY

Computer Science Engineering (Applied AI) student with hands-on experience in AI-powered web application development using Python, React.js, Streamlit, and OpenAI APIs. Skilled in building scalable frontend systems, integrating REST APIs, and developing intelligent applications using Generative AI technologies. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and software engineering principles with a proven track record of delivering impactful academic and personal projects.

WORK EXPERIENCE

AI & Frontend Developer Intern

- Developing AI-powered web applications using React.js, Python, Streamlit, and OpenAI API.
- Built 10+ frontend components and reusable modules, improving UI performance by 25%.
- Integrated RESTful APIs and AI models to deliver real-time, context-aware responses.
- Optimized prompt engineering and workflows, improving response accuracy by 20%.
- Collaborated in a team of 4 to deliver scalable, user-friendly solutions.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering (Applied AI)

2025 – 2029

St. Joseph's University, Chennai, India

- Currently Pursuing | Expected Graduation: 2029

PROJECTS

AI Portfolio Assistant

- Developed an AI-powered portfolio assistant using Python, Streamlit, and OpenAI API.
- Implemented conversational AI workflows for accurate real-time interactions.
- Integrated Generative AI capabilities to provide personalized portfolio assistance.
- Designed a responsive user interface focused on usability and performance.
- Optimized prompt engineering workflows, improving response quality and user experience.

SQUAD – Collaborative Developer Portfolio Platform

- Built a multi-user portfolio platform using React.js with modular and reusable components.
- Implemented project collaboration features, authentication, and responsive UI design.
- Improved state management and component architecture for scalability and performance.

Personal Developer Portfolio

- Designed and developed a responsive personal portfolio website using React.js.
- Focused on clean UI/UX, mobile-first design, and performance optimization.
- Integrated various sections including projects, skills, and contact with smooth navigation.

CountryPeek – Country Information Web App

- Developed a JavaScript-based web application that fetches and displays country data using REST APIs.
- Implemented dynamic data visualization and responsive layouts for enhanced user experience.
- Used DOM manipulation and asynchronous API handling to ensure smooth performance.

SKILLS

</> Languages	: Python, JavaScript (ES6+), Java, C, C++
🖥 Frontend Development	: React.js, HTML5, CSS3, Responsive Web Design
🧠 AI & Generative AI	: OpenAI API, Prompt Engineering, Streamlit, Generative AI, Agentic AI Systems
🔧 Tools & Platforms	: Git, GitHub, VS Code, Figma, Chrome DevTools
📚 Core Computer Science	: Data Structures & Algorithms, OOP, Problem Solving, Time & Space Complexity Analysis

ACHIEVEMENTS

- LeetCode Champion – Kalvium
- Solved 200+ coding problems across DSA platforms.
- Developed and deployed 10+ academic and personal projects.
- Built multiple AI-powered applications using OpenAI APIs.
- Participated in coding competitions and technical workshops.
- Demonstrated strong analytical thinking and problem-solving abilities.
